PROFESSIONAL SUMMARY

Backend-focused Software Engineer skilled in building scalable REST APIs and microservices using Spring Boot, Node.js, Express.js, and PostgreSQL. Experienced in developing AI-powered applications with RAG pipelines, LangChain, and LLM integrations.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Backend: Node.js, Express.js, FastAPI, Spring Boot

Frontend: React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, MongoDB, Supabase, Vector Databases (Chroma)

AI: LangChain, RAG Pipelines, LLM Integration (Claude, Ollama)

Core CS: Data Structures and Algorithms, Object Oriented Programming, Operating Systems

INTERNSHIPS

Software Developer Intern - Piazza Consulting Group

Feb 2026 – May 2026

- Developed backend services using Spring Boot for internal products, implementing REST APIs and contributing to multiple business features in a microservices-based architecture.
- Redesigned the company's website and built responsive landing pages for several AI products and services using React and Next.js.

SDE Intern - Togeno

Jan 2026 – Feb 2026

- Designed and built the backend system for the product using Node.js, Express.js, and Supabase (PostgreSQL), implementing REST APIs for authentication, user management, and core business features.
- Designed the PostgreSQL database schemas, established relationships between multiple entities, and developed efficient queries to support the application's backend functionality.

Backend Intern - Marvedge

July 2025 – Sep 2025

- Built secure backend APIs using Next.js API Routes, integrating NextAuth authentication and middleware for user access control.
- Designed and managed Prisma ORM models with PostgreSQL, implementing database operations and supporting backend features for the production application.

PROJECTS

TalentFlow — Hackathon-to-Hiring Automation System | Node.js · FastAPI · React · LLMs

[GitHub](#)

- Built an AI-powered hiring platform using Claude and Ollama to analyze GitHub repositories, generate code summaries, compare resumes against job descriptions, and automate candidate evaluation.

Personal AI Assistant — RAG-Based LLM Pipeline | LangChain · Vector DB · Python · LLM API

[GitHub](#)

- Built a RAG pipeline with LangChain indexing 10+ documents into a vector database, improving answer relevance by 40% over baseline LLM responses.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Oct 2023 – Jul 2026

Teegala Krishna Reddy Engineering College

CGPA: 7.4/10

Diploma in Electronics and Communication Engineering

Nov 2020 – Jun 2023

Govt. Polytechnic Jogipet

CGPA: 7.5/10

CERTIFICATIONS & TRAINING

- Engineer AI Agents with Agent Development Kit (ADK) – [GOOGLE](#)
- Building Modern Web Applications with MERN Stack – **EY Global Delivery Services, AICTE & Edunet Foundation**

ACHIEVEMENTS & RECOGNITION

- 1st Place — College Hackathon (50+ participants): Built a scalable full-stack web application judged on technical depth, scalability, and UX; awarded by faculty panel against 15+ competing teams.
- Mentored 5+ peers and seniors on mini and major academic projects, guiding full-stack development (MERN, APIs, database design), improving project quality and reducing development time.
